

## **Job Description: Software Engineer - Backend (Python)**

**Company:** NovaTech Solutions Pvt. Ltd.

**Location:** Bangalore, India (Hybrid)

### **Role Overview:**

We are looking for a Backend Software Engineer with strong experience in Python, REST APIs, and relational databases. The candidate will work on building scalable microservices for our B2B SaaS platform.

### **Key Responsibilities:**

- Design, develop, and maintain RESTful APIs using Python.
- Work with relational databases (PostgreSQL/MySQL).
- Collaborate with cross-functional teams.
- Write clean, testable, and well-documented code.
- Participate in code reviews.

### **Required Skills:**

- 2–4 years backend experience.
- Strong Python programming.
- Experience with FastAPI / Flask / Django REST.
- Understanding of PostgreSQL or MySQL.
- Knowledge of Git and CI/CD.
- Docker and cloud basics (AWS/GCP/Azure) preferred.

### **Education:**

- B.E/B.Tech in Computer Science or related field.
